RE: WC Docket No. 03-133

Dear Chairman Powell:

Minority communities living in urban areas rely upon low-cost telephone services to accomplish many every day tasks, from looking for a job or affordable housing to staying in touch with family and friends. I am concerned that the FCC is considering new charges and fees upon pre-paid calling cards, which would raise prices for consumers nationwide.

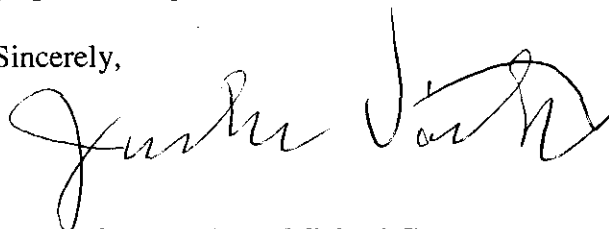

In particular, minority consumers living on fixed incomes or those without the means necessary to subscribe to local telephone service rely on prepaid calling cards to stay connected at set, affordable rates. Students, immigrants, senior citizens, military personnel, and others face similar challenges.

As a result, prepaid calling cards often are the only option available – without them, some consumers would, quite literally, be out of choices for staying connected. Raising the price of prepaid services will directly harm those that can least afford price increases.

Imposing new charges and fees would amount to a substantial increase in the per-minute cost of prepaid calls, destroying the utility of calling cards to many consumers in our community. Allowing the large, local telephone companies to collect such charges, even when they do not sell the calling card to a customer, would drive up prices and would make these services substantially less affordable.

Please look out for consumers by refusing to impose new access charges and fees on prepaid calling card services.

Sincerely,

A handwritten signature in black ink, appearing to read "Jonathan Adelstein", written in a cursive style.

RE: WC Docket No. 03-133

Chairman Powell:

The FCC should **not** impose new access charges and fees upon prepaid calling cards. If you move to increase the cost of these cards, you will simply drive up the cost for minority or disadvantaged individuals to stay in touch in their communities.

The African-American community is particularly sensitive to any price increase for prepaid calling cards; approximately 70% of African American households have used them. Indeed, half of U.S. households with income below \$20,000 have used prepaid cards. Pre-paid cards are so prevalent in part because they save consumers money.

With other goods like gas and milk rising these days, we should not now be faced with rising telephone costs as well. In particular, many low-income households who are on fixed incomes depend upon prepaid service because they cannot meet the credit rating or hefty deposit requirements that local phone companies insist upon before getting a phone. With prepaid cards, consumers can make calls from payphones or the telephones of family members and neighbors. They can use these cards to stay "connected" as they look for jobs, hunt for housing, or schedule many of the other daily appointments that we all have.

I simply find it unimaginable that the FCC would impose new charges and fees on these cards. Some of the nation's largest telephone companies would be the largest recipients of such charges. **The FCC should stand up for consumers and make sure that these charges will not apply to prepaid calling cards.**

Sincerely,

Re: WC Docket No. 03-133

Dear Chairman Powell:

I am writing to add my voice to the growing number of groups and individuals **opposed** to efforts by the local Bell telephone companies to circumvent current rules on calls placed with a pre-paid calling card. If they succeed, it will result in higher rates – in many cases, dramatically higher rates – for consumers who place the calls. As you approach your work on this docket, I implore you to keep the needs of consumers in mind rather than the pleadings of the four Bell companies.

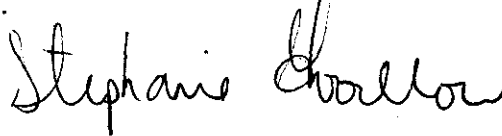

The Bell companies want to target those calls in which a caller uses a pre-paid calling card and dials a toll-free number, along with his or her PIN. The caller, who may be in Virginia, for example, is connected to a “platform” in another state -- let’s say in Nebraska. From this “platform,” he or she hears a message about a company, non-profit or person. The caller then dials the telephone number of someone in Virginia. Current rules, as well as common sense, state that this represents two calls, one from Virginia to Nebraska and one from Nebraska to Virginia. Both calls are subject to interstate access charges because there is a call to Nebraska and then a separate call to Virginia.

But the Bell companies want to treat this as a single in-state call so they can levy exorbitant in-state access charges. Such fees have no relationship whatsoever to the Bell companies’ actual costs, which are only a fraction of what they want to charge consumers.

Prices are already rising for gas, milk and other products. Consumers don’t need higher prices for phone calls too, especially when these higher rates represent a blatant giveaway to four large corporations.

I am aware that the long distance companies and others that sell pre-paid calling cards have weighed in with the FCC in an effort to protect their customers’ interests in this manner. It is now time for the FCC to weigh in on the side of consumers and show the Bell companies the door on this issue.

Sincerely,

As you approach your work on this docket, I implore you to keep the needs of consumers in mind rather than the pleadings of the four Bell companies.

The Bell companies want to target those calls in which a caller uses a pre-paid calling card and dials a toll-free number, along with his or her PIN. The caller, who may be in Virginia, for example, is connected to a “platform” in another state -- let’s say in Nebraska. From this “platform,” he or she hears a message about a company, non-profit or person. The caller then dials the telephone number of someone in Virginia. Current rules, as well as common sense, state that this represents two calls, one from Virginia to Nebraska and one from Nebraska to Virginia. Both calls are subject to interstate access charges because there is a call to Nebraska and then a separate call to Virginia.

But the Bell companies want to treat this as a single in-state call so they can levy exorbitant in-state access charges. Such fees have no relationship whatsoever to the Bell companies’ actual costs, which are only a fraction of what they want to charge consumers.

Prices are already rising for gas, milk and other products. Consumers don’t need higher prices for phone calls too, especially when these higher rates represent a blatant giveaway to four large corporations.

I am aware that the long distance companies and others that sell pre-paid calling cards have weighed in with the FCC in an effort to protect their customers’ interests in this manner. It is now time for the FCC to weigh in on the side of consumers and show the Bell companies the door on this issue.

Sincerely,

A handwritten signature in black ink, appearing to read "David Weaver". The signature is fluid and cursive, with a large initial "D" and a long, sweeping underline.

Re: WC Docket No. 03-133

Dear Chairman Powell:

I am writing to add my voice to the growing number of groups and individuals **opposed** to efforts by the local Bell telephone companies to circumvent current rules on calls placed with a pre-paid calling card. If they succeed, it will result in higher rates – in many cases, dramatically higher rates – for consumers who place the calls. As you approach your work on this docket, I implore you to keep the needs of consumers in mind rather than the pleadings of the four Bell companies.

RE: WC Docket No. 03-133

Dear Chairman Powell:

Minority communities living in urban areas rely upon low-cost telephone services to accomplish many every day tasks, from looking for a job or affordable housing to staying in touch with family and friends. I am concerned that the FCC is considering new charges and fees upon pre-paid calling cards, which would raise prices for consumers nationwide.

In particular, minority consumers living on fixed incomes or those without the means necessary to subscribe to local telephone service rely on prepaid calling cards to stay connected at set, affordable rates. Students, immigrants, senior citizens, military personnel, and others face similar challenges.

As a result, prepaid calling cards often are the only option available – without them, some consumers would, quite literally, be out of choices for staying connected. Raising the price of prepaid services will directly harm those that can least afford price increases.

Imposing new charges and fees would amount to a substantial increase in the per-minute cost of prepaid calls, destroying the utility of calling cards to many consumers in our community. Allowing the large, local telephone companies to collect such charges, even when they do not sell the calling card to a customer, would drive up prices and would make these services substantially less affordable.

Please look out for consumers by refusing to impose new access charges and fees on prepaid calling card services.

Sincerely,

A handwritten signature in cursive script that reads "Evelyn Locke". The signature is written in dark ink and is positioned below the word "Sincerely,".
